

Sensing Insight Sphere

Hypotheses & Experiments

- Potential Experiments and Measurements
- Assumptions about our Approach

Assumptions about our Approach:

Formulating hypotheses about the strategies and methodologies employed in the project.

Things We Could Test or Measure:

Identifying measurable elements and potential tests that can validate the project's approach.

Stakeholder Constraints and Concerns:

Identifying any limitations or worries that the stakeholders might have regarding the project.

Stakeholder Landscape

- Stakeholder Needs and Expectations
- Stakeholder Constraints and Concerns

Stakeholder Needs and Expectations:

Understanding what the stakeholders expect and require from the project.

Short-term Hopes and Goals:

Immediate objectives and insights that the project aims to achieve.

Explorative Goals

- Immediate Insights and Objectives
- Future Insights and Objectives

Long-term Hopes and Goals:

The broader objectives and insights that the project aspires to realize over time.

Opportunities, Advantages, Strengths, and Possibilities:

The potential benefits and strong points of the project.

Opportunities & Challenges

Constraints, Obstacles, Complexities, and Risks:

The potential limitations and challenges that the project may encounter.

- Potential Advantages and Strengths
- Potential Constraints and Risks
